

I CLAIM:

1. An oral treatment/care agent, such as a dental treatment/care agent or periodontal treatment/care agent, or an intraoral-bone anaplastic agent, said agent comprising an antifungal agent and antibiotic.
2. An oral treatment/care agent, such as a dental treatment/care agent or periodontal treatment/care agent, or an intraoral-bone anaplastic agent, said agent comprising an immunostimulator and antibiotic.
3. An oral treatment/care agent, such as a dental treatment/care agent or periodontal treatment/care agent, or an intraoral-bone anaplastic agent, said agent comprising an oral bacterial flora-controlling agent that will restore abnormal or sick oral bacterial flora to a normal or healthy oral bacterial state; and a periodontal-pocket bacterial flora-controlling agent that will eliminate or convert the bacteria, fungi, viruses and other microbes in a periodontal pocket into a group of symbiotic bacteria.
4. The oral treatment/care agent according to claim 1, further comprising the inclusion of nitrogen.
5. The oral treatment/care agent, wherein the antifungal agent in claim 1 is amphotericin B.
6. The oral treatment/care agent, wherein the antibiotic in claim 1 or claim 2 is a macrolide antibiotic.
7. The oral treatment/care agent, wherein the antibiotic in claim 1 or claim 2 is azithromycin.
8. The oral treatment/care agent in any of claim 1 through claim 5, further comprising a membrane for rebuilding the periodontium.
9. The oral treatment/care agent in any of claim 1 through claim 5, further comprising a periodontium inducing agent or dental-pulp inducing agent.
10. The oral treatment/care agent in any of claim 1 through claim 5, further comprising a component of a prosthesis through application thereto or inclusion therein.
11. The oral treatment/care agent in any of claim 1 through claim 5, characterized by the method of its administration, being any of, or any combination of, mixed, time-release, local or non-local administration.
12. The oral treatment/care agent according to claim 6, further comprising a membrane for rebuilding the periodontium.
13. The oral treatment/care agent according to claim 7, further comprising a membrane for rebuilding the periodontium.
14. The oral treatment/care agent according to claim 6, further comprising a periodontium inducing agent or dental-pulp inducing agent.

15. The oral treatment/care agent according to claim 7, further comprising a periodontium inducing agent or dental-pulp inducing agent.

16. The oral treatment/care agent according to claim 8, further comprising a periodontium inducing agent or dental-pulp inducing agent.

17. The oral treatment/care agent according to claim 6, further comprising a component of a prosthesis through application thereto or inclusion therein.

18. The oral treatment/care agent according to claim 7, further comprising a component of a prosthesis through application thereto or inclusion therein.
